

Coursework for a minor in Nutrition

The Nutrition minor gives students a mastery in the fundamental knowledge of the field of nutrition and allows them to evaluate research and resources of the effects of nutrition on health and disease.

Students should check the prerequisite requirements for each course they plan to take.

Some courses require prerequisite courses.

Students must have a GPA of 2.00 or greater in the minor.

Contact Person: Deanne Allegro, Department of Kinesiology

One prerequisite courses are required before you begin the nutrition minor.

Grade

BIOL 1010/1011, BIOL 1017/1018 , or BIOL 1000/1001 (can be used as Core)

Course

Grade
